Matt,

I haven't had a chance to read the article yet, but thought it would be of interest.

I also thought the CBS would be of interest. I don't know where they got their figures, but I assume we probably received fewer than 6,500 8(e) submissions in 2010. I would think that there might have been a fair amount of exposure in those incidents as well.

Randy

Bloomberg BusinessWeek has an extensive article on the 'interesting' characters that run the company and the clumsy efforts to ameliorate the spill.

As an aside, "an analysis by CBS found more than 6,500 industrial accidents, fires, spills, and leaks in 2010 – for an average of 18 a day."
